Innovative Intensification in Cow-Calf Systems

About the Eng Foundation
The Dr. Kenneth & Caroline McDonald Eng Foundation was established in memory and as a legacy to Caroline who loved life, cattle and cattle people, and as an avenue to help future scholars while enhancing beef cattle research.

About the Symposium
A symposium is held yearly as an outlet for universities to present research being conducted through grants provided by the Eng Foundation. The research targets the improvements of beef cow efficiency and profitability by intensive and semi confined production systems. This year’s symposium will be held at the Embassy Suites, San Antonio Riverwalk, September 18-19 and will be hosted by Texas A&M University and the Eng Foundation. The University of Nebraska-Lincoln and Oklahoma State University will also be participating in the Symposium.

Attendees will include researchers, students and cattle producers alike. This symposium provides a unique opportunity to sponsor innovative research, provide learning opportunities for students and advertise your business. For more information, visit the following web address: http://animalscience.tamu.edu/eng-symposium/.

Sponsorship
Sponsorship may be obtained at two levels:

- Full page ad in symposium proceedings: $1,000
  - Includes two complementary registrations to attend the Symposium*
  - Sponsorship recognition at the Symposium
- Half page ad in symposium proceedings: $500.00
  - Includes one complementary registration to attend the Symposium*
  - Sponsorship recognition at the Symposium

If you are interested in becoming a sponsor of the 2014 Dr. Kenneth and Caroline McDonald Eng Foundation Symposium: Innovative Intensification in Cow-Calf Systems, please contact the Eng Foundation at 575-743-6331 or by email at engnm@hotmail.com.

We appreciate your support and look forward to seeing you at the Symposium!

*Please provide the names of the individuals who will be attending.
