INTRODUCTION

WHY HAVE AN EMERGENCY EVACUATION PLAN?

During certain emergency conditions, it may be necessary to evacuate a building. Examples of such occasions include: smoke/fire, gas leak, bomb threat. Pre-planning and rehearsal are effective ways to ensure that building occupants recognize the evacuation alarm and know how to respond. Practicing an evacuation during a non-emergency drill provides training that will be valuable in an emergency situation.

CLASSROOM EVACUATION PROCEDURES

Students are visitors to a building and may not know what procedures to follow during an emergency. The class instructor is responsible for providing pertinent information both at the beginning of a semester and at the time of the evacuation to ensure that students evacuate the building in a safe manner.

CONTACT PERSONNEL

Building Proctors

Name	Office Location	Office Phone	Home Phone	E-Mail
Harry Cralle	217B	5-9634	693-7293	Hcralle@tamu.edu

FIRE REPORTING PROCEDURES

If you discover FIRE or SMOKE:

1. Activate manual fire alarm **pull station** if possible.
2. If you are not in immediate danger, notify the Emergency Operator (**9-911**) and provide:

Your Name

Fire Location (Bldg. # 1502, Floor #___, Room #___)

Size and Type of Fire

Any additional information requested by the Operator

3. If you are not in immediate danger, also notify the Building Fire Marshal .
4. If you are trained in the proper use of portable fire extinguishers and are not in immediate danger, you may attempt to fight the fire. Do not place yourself or others in unnecessary danger.

If you are TRAPPED in the building and cannot find an escape route:

Call the Emergency Operator (**9-911**) and give your exact location.

FIRE MARSHAL RESPONSIBILITIES

1. Serve as a **liaison** with emergency responders (e.g., fire department, UPD, ambulance, Environmental Health & Safety).
2. Meet responders upon their arrival and convey specific **information about hazards** in the building, access, locations of persons with special needs, etc.
3. **Maintain communication** with Floor Proctors regarding the status of the emergency.
4. Upon receiving clearance from the emergency responders, notify Floor Proctors and building occupants that the building is **safe for re-entry**.

OCCUPANT RESPONSIBILITIES

1. You are responsible for your own safety! **Stay calm** - avoid panic and confusion.
2. Know the locations and operation of **fire extinguishers**.
3. Know how to report an emergency (**9-911**).
4. When the fire alarm sounds, make sure **other personnel** in your immediate area are aware of the alarm.
5. **Close** but **DO NOT LOCK** doors as you leave. Items requiring security may be placed in a locking file cabinet or desk drawer on the way out. Turn off unnecessary equipment, if possible.
6. Know the locations of primary and alternate exits. During an emergency, walk to the nearest exit and **evacuate** the building. NOTE: **Do not** use the elevators during a fire-related emergency!
7. Go to your assigned **area of assembly** outside the building and wait there. Do not leave the area unless you are told to do so.
(Building occupants are to assemble in the bicycle parking area across the street in front of the HEEP Center (Parking lot 67 .)
8. **Wheelchair occupants** not able to exit directly from the building are to proceed to and remain in a stairwell vestibule. Inform evacuating occupants to notify the Fire Marshal of your location. Fire Department personnel will evacuate wheelchair occupants from the building.
9. **Do not re-enter** the building until you have been notified to do so. Fire personnel often silence the alarm in order to communicate with each other. Silencing the alarm is **NOT** a signal for occupants to re-enter!

FLOOR PROCTOR RESPONSIBILITIES

1. Routinely **inspect** for possible fire hazards on your floor and report to the Fire Marshal.
2. Know locations of and how to use all **fire protection equipment** on your floor.
3. Ensure that occupants (including new employees) are **familiar** with evacuation procedures.
4. Be aware of **building occupants with special needs** who may need assistance during an evacuation.
5. As an integral part of the building's **emergency communication** network, floor proctors are to ensure that occupants on their floor are aware of an emergency and the need to evacuate.
6. Report the incident by calling **9-911** and/or **pull the fire alarm** whenever a situation could pose immediate danger to people, property, or processes in the building.
7. Assist in the **evacuation process** as indicated in the Floor Proctor Evacuation Procedure.

FLOOR PROCTOR EVACUATION PROCEDURE

1. Notify the University Emergency Operator (**9-911**) if you have information related to the emergency. Be ready to provide:

Your Name

Fire Location (Bldg. # 1502 Floor # ___ Room # ___)

Type of Emergency

Any addition information requested by the Operator

2. Alert all occupants on your floor. Check remote areas such as restrooms and storerooms and **close doors** if possible on your way out. Maintain orderly evacuation of occupants.
3. Ensure that all **personnel with special needs** are alerted and that someone is assisting with their evacuation.
4. If the emergency is located **on your floor** and you are not in immediate danger:

 You may attempt to determine which smoke detector or pull station was activated.

 If you are trained in the proper use of portable fire extinguishers, you may attempt to fight or contain a fire. Do not place yourself or others in unnecessary danger.
5. Evacuate the building and **report pertinent information** to the Fire Marshal (e.g., evacuation status, location of persons with special needs, type and location of emergency).
6. Proceed to your **assigned entrance** (to be assigned at time of fire by Fire Marshal as needed) until further notice from the building Fire Marshal. Do not allow personnel to re-enter the building **until** you have been notified to do so. Fire personnel often silence the alarm in order to communicate with each other. Silencing the alarm is **NOT** a signal for personnel to re-enter.

FIRE DRILL POLICY

1. Fire drills should be conducted at least annually at unexpected times and under varying conditions to simulate the unusual conditions that occur in the case of fire. Various means of exit could be made temporarily unavailable in order to familiarize occupants with secondary routes of evacuation.
2. Fire drills will be scheduled by the *Fire Marshal*. Notify Area Maintenance, the Radio Room (5-4311), and the Environmental Health and Safety Department (5-2132) one week prior to the drill.
3. Fire drills should involve **all** occupants. Everyone should leave the building when the fire alarm sounds. Exemptions are strongly discouraged. It may be advisable to notify wheelchair occupants prior to planned fire drills.
4. In the conduct of drills, emphasis shall be placed upon orderly evacuation under proper discipline rather than upon speed. The Fire Marshal and Floor Proctors are expected to perform their assigned duties as if in an actual emergency situation.
5. Provisions should be made for timing and evaluating the orderliness of each drill.
